

SEE HOW WELL IT DRIVES.

PROFITS.

International® 8000 Series

YOU HAVE A HEAD FOR BUSINESS. HERE'S A TRUCK TO MATCH.

Real success in applications like regional haul and urban delivery calls for a truck that does more than just perform. It demands an International® 8000 Series truck.

First and foremost, these trucks are built to achieve maximum uptime – with optimized components, unmatched reliability and easy serviceability.

Of course, International 8000 Series trucks don't just stay on the road – they glide aerodynamically over it. A dramatically sloped hood. Swept-back and curved windshield. Patented “pod”

roof fairing. Aero sunshade and cab side extenders. These and other wind-taming features allow International 8000 Series trucks to stream through the air for optimum fuel efficiency.

The aerodynamic design also means dynamic driver-pleasing looks. Drivers will be equally drawn to the outstanding responsiveness, ride and maneuverability; the excellent visibility; and the spacious, comfortable and quiet cab environment.

A pleasure to own, drive and maintain, the International 8000 Series is a smart business solution for your operation.

The 107" (272 cm) BBC International® 8600 features a 46" (117 cm) set-back wide-track front axle and 50° wheel cut for outstanding maneuverability and weight distribution. The 107" (272 cm) BBC International® 8500 features a 39.9" (102 cm) set-back axle and 50° wheel cut for outstanding maneuverability in the narrowest loading docks.

International® 8600 6x4 Day Cab

The superior reliability of International® 8000 Series trucks reduces downtime, resulting in increased profitability for your operation.

IF YOU GRADE ON PERFORMANCE, THESE TRUCKS SET THE CURVE.

ENRICHING THE OWNER.

- The double-sided galvanized steel cab is built to +/- 1-mm tolerances for outstanding durability and automotive fit and finish.
- The 120,000-psi (827,400 kPa) frame rail is stronger than competitive frames of similar size – without reinforcements or inserts.
- Fuel economy is optimized through aerodynamic design. Aerodynamics are optimized with a dramatically sloped hood; swept-back and curved windshield; patented “pod” roof fairing; aero sunshade and mirrors; smooth, curved bumper; and tractor side fairings.
- Three-step E-Coat prime/base coat/urethane clear coat paint process for the cab and hood helps to resist corrosion, minor scratches and fading. Backed by a five-year limited cab warranty.
- Breakaway mirror design withstands up to a 9-mph impact, reducing progressive door damage by as much as \$900-\$1,200. (Optional chrome mirrors shown.)

EXCITING THE DRIVER.

- Set-back wide-track axle and wheel cut up to 50° deliver outstanding maneuverability and weight distribution.
- Boldly styled sloped hood offers impressive forward visibility. The 2,038-sq-in (13,148 sq cm) windshield offers a commanding view of the road with outstanding peripheral vision.
- High-pressure power steering pump reduces driver fatigue during tight maneuvers.

- Lightweight parabolic taperleaf front springs deliver improved ride and handling.
- Slip-resistant offset steps and grab handles provide easy three-point entry/egress.
- Frame-mounted vertical muffler reduces interior noise and increases cab structural integrity.

DELIGHTING THE MAINTAINER.

- Three-piece hood design allows individual sections to be removed and replaced, making repairs \$700-\$3,000 less than competitive hoods.
- Splash shields tilt with the hood to provide easy under-hood access and routine maintenance checks. Service fill points are accessed from ground level.
- Rubber front spring pin bushings are maintenance-free.
- Color-coded, continually numbered air lines ensure quicker troubleshooting and repairs. Smart frame routing and clipping reduce chaffing of air lines and electrical harnesses.
- A self-diagnostic protection system shuts down the A/C compressor in the event of a refrigerant leak to prevent further damage – a potential repair savings up to \$250.
- The chrome grille can be replaced independently in less than 15 minutes.
- The International® Diamond Logic™ electrical system with low-current components extends the life expectancy of cab switches. Self diagnostics and a 40% reduction in wiring simplify troubleshooting and get the vehicle back on the road an average of 20% faster, saving as much as \$500 over the life of the truck.

YOU DON'T OWN THE ROAD. IT JUST FEELS LIKE IT.

- The ergonomic dashboard and wing panel make all switches easy to see and reach.
- One of the industry's most comfortable and spacious cabs – measuring 72.5" (184 cm) wide and 58" (147 cm) floor to ceiling – brings out the best from drivers.
- Standard air-ride cab suspension provides an incomparably smooth ride.
- The large curved windshield and sloped hood create a commanding view of the road with outstanding peripheral vision.
- The overhead storage area features dual storage pockets with retainer nets and a CB radio pocket.
- The cab is ergonomically designed for driver comfort and productivity. More shoulder room, headroom and belly room, standard high-back seats with integrated headrests, easy-to-read gauges and easy-to-use controls.
- The best-in-class HVAC system increases air-conditioning, heating and defrosting flow.

- Insulation and seals make the cab more thermally efficient and quiet.
- The optional 26" (66 cm) extended cab with available lift-up bunk provides the comfort of a full-size sleeper.

- The fully programmable International Diamond Logic™ electrical system allows for automation of headlights, suspension dump valve, air slide fifth wheels, power door locks and more.

- Two interior trim levels:

DELUXE: Easy-to-clean molded interior surfaces, 1,481 cu in (24,269 cu cm) of storage space, including two large overhead bins, CB storage overhead, center instrument panel bin, driver storage/map pocket and coat hook.

PREMIUM: Everything in Deluxe plus an additional 222 cu in (3,638 cu cm) of storage in passenger door, compass, outside temperature display, auxiliary visor, door panels with cloth inserts, two additional speakers and individual map lights.
